PROFESSIONAL SUMMARY

Recent B.Sc. Computer Science (Data Science & Analytics) graduate who likes figuring out why things break and explaining the fix in plain words. I've worked with databases, Python scripts and web projects, and I document what I do so the next person doesn't have to guess. I'm looking to start in a service desk role where I can learn ITSM processes, handle user issues patiently and grow into infrastructure support.

SKILLS

Support & Troubleshooting: Problem diagnosis, issue documentation, requirement gathering, clear written and verbal communication, follow-up until resolution

Programming & Databases: Python, SQL, MySQL, C, JavaScript, HTML, CSS, PHP (basics)

Tools & Platforms: MS Excel, Google Sheets, Power BI, Tableau, Oracle Cloud Infrastructure, Git, GitHub, Google Colab, VS Code, Figma

Soft Skills: Teamwork, time management, quick learner, attention to detail, working under deadlines

EXPERIENCE

Tech Trainee – AI Startup, Chennai *Present*

- Validated and cleaned a large contact database using Python scripts (DNS/MX email checks, duplicate removal), so records were accurate and usable.
- Prepared documentation for a hackathon: problem statements across 12 domains, minutes of meetings and daily work tracking sheets.
- Coordinated with team members and participants on schedules and queries during the event.

Web Development Intern – V7 Lancers *2 months*

- Worked between the client and the development team to gather and document requirements for a 13-section website.
- Spotted structure and workflow issues in the site and suggested UI changes to improve accessibility and consistency.

Social Research Intern – EKTA Resource Centre for Women *Internship*

- Collected input through structured surveys, analyzed field data and wrote reports that supported safety recommendations.

PROJECTS

Smart Parking & Predictive Allocation Platform *Python, Data Analytics*

- Built an availability tracker from occupancy data and analyzed peak-hour trends, improving spot allocation by 25%.

AI-Based Traffic Monitoring System *YOLOv8, OCR, Python*

- Classified vehicles and violations from CUMTA traffic video and advanced to the CUMTA Innovation Challenge screening round.

Document Intelligence Retrieval System (RAG) *Gemini API, ChromaDB, Python*

- Built a semantic search pipeline over PDF, DOCX and TXT files so users can ask questions and get relevant answers.

EDUCATION

B.Sc. Computer Science (Data Science & Analytics) *2023 – 2026*

Manikam Ramaswami College of Arts and Science, Madurai Kamaraj University | CGPA: 7.82

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 | Python for Data Science – NPTEL
- Machine Learning, Object-Oriented Programming in Python, Basics of Python – Infosys Springboard
